

ANKLE BITER

So you have all the titanium and carbon bits you can dream of, but junior is still on one of those noisy black plastic scooters. Why should you have all the fun. Enter, stage left, the Harley Davidson of scooters, the Ybike. The longer fork rake will stop junior bleeding his nose when he hits that piece of chewing gum on the pavement, and the covered rear wheel stops toes from being ridden over. And the look is pure biker. R300, ybike.co.za
